

Yes I'm Single

Safeguarding Fact Sheet for Institutional Partners

What Yes I'm Single Is

Yes I'm Single (Y.I.S.) is a verified proximity signal, not a dating or messaging app. Members opt in to show as "open to a conversation" to other verified members physically nearby - there is no in-app chat, no profile browsing, and no way to contact anyone remotely. The only way to act on a signal is to walk up and say hello, in person.

Core Safeguards

- **No chat, no DMs - ever**
There is no private messaging system in the app for anyone to exploit.
- **Selfie + liveness verification**
Every member passes a live selfie and gesture check before appearing to anyone - no catfishing, no burner accounts.
- **Invisible by default**
Visibility is opt-in and instantly revocable. Nobody is "on display" - it's a private signal, not a public profile.
- **Hard 18+ age gate**
Date of birth is verified at signup; under-18 signups are blocked outright.
- **Block & report, permanent bans**
In-app reporting escalates to human review; violations result in permanent account bans.
- **Law enforcement cooperation**
A full audit trail is available to law enforcement on formal request.

What We're Asking Of Your Institution

A single free vinyl window decal with a QR code, placed in a staff-only or student-only area (break room, halls of residence, students' union noticeboard) - never a clinical or patient-facing space. There is no cost and no ongoing admin on your side. We supply and post the decal, and can remove it at any time on request.

A Head Start For Your Community

Any .ac.uk, .nhs.net or .gov.uk email address is instantly verified and receives an extended free trial automatically - no integration or setup required on your end.
