

Yes I'm Single

Trust & Safety Overview for Institutional and Venue Partners

Yes I'm Single (Y.I.S.) is a verified proximity signal, not a dating or messaging app. Every feature below exists so it's genuinely safe to recommend to your students, staff, patients, or customers.

Identity & Trust Verification

- **Selfie + liveness/gesture check**
No catfish accounts, no bots - every member is a real, live person.
- **Institutional email auto-verification**
.ac.uk, NHS (.nhs.net/.nhs.uk) and .gov.uk addresses get an instant trust badge.
- **Hard 18+ age gate**
Date of birth is checked at signup; under-18 signups are blocked outright.
- **Bronze / Silver / Gold verification tiers**
Visible to other members before anyone ever approaches.

Privacy Controls

- **On/Off visibility toggle**
Members are only ever discoverable when they actively opt in.
- **Safe Zones (Home & Work)**
Auto-hidden near saved locations - even if a member forgets to toggle off.
- **Exact GPS never shared**
Others only ever see a computed distance (e.g. "42m away"), never coordinates.
- **No data sold or exposed to venues**
Location history is a private recall feature for that member only.

Physical Safety & Anti-Harassment Design

- **No chat, no DMS, no profile browsing**
Zero remote contact, ever - the only way to act on a signal is in person.
- **Anonymous proximity alerts**
"Someone new is nearby" shows a distance only - never a name or photo.
- **One-tap Report & Block**
Mutual, permanent blocking enforced at the database level.
- **Human-reviewed reports, permanent bans**
Every report is escalated to central admin review.

Data & Payment Security

- **Bcrypt password hashing**
Plaintext passwords are never stored or seen by YIS staff.
- **Rate-limited login & reset endpoints**
Automated brute-force attempts are blocked.
- **PCI-compliant payments via Stripe**
Card details never touch YIS servers.
- **24/7 automated error & uptime monitoring**
Issues are caught and alerted on before they affect members.
